PROFILE

Biochemistry graduate from Caleb University, First Class Honors (4.94/5.00). Background spans clinical diagnostics, natural product research and biochemical analysis, with a growing focus on data analysis and computational approaches to biological systems. Comfortable moving between the bench and the spreadsheet - equally at home running an assay or building a dashboard.

EXPERIENCE

Executive Assistant to the CEO | *Highfield Oil Company, Lagos* August 2026 – Present

- Manage technical workflows and coordinate with engineering teams and development partners to keep project execution on track.
- Oversee integration roadmaps, track milestones and deliverables, and follow up on outstanding tasks and blockers.
- Act as the main point of contact between the CEO, technical teams and external partners, keeping communication clear and execution timely.
- Support the CEO with executive coordination, project organization, stakeholder communication and day-to-day operational priorities.

Project Assistant | *Bon Intelligence, Lagos* August 2026 – Present

- Support the coordination of BON Intelligence's operations and project activities across the African market.
- Monitor product development activities and implementation progress, ensuring project requirements and deliverables are properly documented.
- Assist with the preparation of product presentations, project briefs and materials for client and stakeholder engagements.
- Contribute to retail transformation initiatives involving AI analytics, in-store media, loss prevention and inventory visibility.

Project Coordinator | *Intrasolutions Consultancy Ltd, Lagos* Jan 2025 – July 2026

- Coordinate day-to-day operations and communication between the Lagos and Istanbul teams, keeping project files and client records up to date.
- Pull together operational data into reports that inform planning and client-facing decisions.
- Helped tighten up documentation and delivery tracking, which lifted on-time project completion to 95%.

Data Science Intern | *Analyst Lab Africa* May 2026 – Jul 2026

- Cleaned and preprocessed raw datasets, then worked through them for patterns and relationships worth flagging.
- Used basic statistical methods to test whether those relationships actually held up.
- Wrote up findings as short, structured reports rather than raw output dumps.

AI Intern | *Decode Labs* May 2026 – Jun 2026

- Researched current AI tools and use cases to support the team's work.
- Picked up hands-on exposure to how AI concepts translate into real workflows, not just theory.

Customer Experience | *Vcare Diagnostic Limited, Lagos* Aug 2024 – Oct 2024

- Handled front-desk client communication and kept service turnaround on schedule.
- Maintained the CRM system - accurate records, timely follow-ups.
- Kept the Laboratory Information Management System organized, which made sample and record tracking noticeably smoother.

Administrative & Research Support Intern | *NNMDA, Lagos* May 2024 – Aug 2024

- Drafted consent forms and the regulatory paperwork needed for research compliance.
- Handled scheduling and recruitment logistics for community-based programs.
- Standardized the team's reporting templates, which made documentation more consistent across projects.

RESEARCH EXPERIENCE

Laboratory Intern | *Vcare Diagnostic Limited, Lagos* Aug 2024 – Oct 2024

- Worked across pre-analytical, analytical and post-analytical stages in Biochemistry, Hematology, Microbiology and Serology.
- Ran biochemical and hematological assays - liver enzyme profiling, glucose testing, lipid analysis
- Operated and maintained hematology analyzers, immunoassay systems and clinical chemistry analyzers under senior scientist supervision.

Research Intern | *Nigeria Natural Medicine Development Agency (NNMDA), Lagos* May 2024 – Aug 2024

- Reviewed literature and supported experimental work on herbal and natural medicine development.
- Helped design and document plant-based therapeutic research, including characterizing bioactive compounds.

PUBLICATIONS & MANUSCRIPTS

- Algal Synthesis of Metal-Based Nanoparticles for Corrosion Protection and Adsorption: A Review
- In Silico Network Pharmacology and Computational Modelling of Bioactive Compounds From Allium cepa Targeting Downstream Protein Effectors in Diabetes
- Kinetic and pH Effect on the Binding Interactions of Amoxicillin to Bovine Serum Albumin: Spectroscopic and Molecular Docking Studies (in process)
- Bridging Static Docking and Dynamic Enzyme Kinetics: A Tensor-Based Hybrid Model for Predicting Drug–Enzyme Interactions

RESEARCH PRESENTATIONS

- Evaluation of Insulin, Triglycerides, and HDL Cholesterol Levels in Hypertensive Obese Rats - Undergraduate Thesis, Caleb University (2025)
- The Ste2 Gene in GPCR as Ligand-Binding Receptor for Pheromone in S. cerevisiae Using Quantum Effects - SCIMA Seminar (2025)
- Deciphering the Function of Heterodimeric and Multimeric Enzymes Using HIV-1 Reverse Transcriptase - Caleb University Seminar (2024)
- Assessment of Preservative Content and Quality in Common Food Items from Nigerian Market - NNMDA (2024)

EDUCATION

B.Sc. Biochemistry - Caleb University

First Class Honors, 4.94/5.00 CGPA

Relevant coursework: Enzymology, Biochemical Methods & Instrumentation, Statistics and Probability, Bioenergetics, Metabolism of Biomolecules, Pharmaceutical Biochemistry, Tissue Biochemistry, Immunochemistry, Genetics, Microbiology, Membrane Biochemistry, Physical Chemistry, Organic Chemistry, Spectroscopy, Biotechnology and Genetic Engineering.

LEADERSHIP & SERVICE

- Founder & President, Scientific Minds of Africa (SCIMA) - leads a 10-member team running outreach programs for 50+ students and has built 3 university partnerships (2024–Present).
- General Secretary & Treasurer, Angelique Family Foundation - manages budgets, financial reporting and outreach for 200+ participants (2021–Present).
- Team Lead, Rotary Youth Leadership Academy 2025 - ranked 2nd of 375 participants.
- Female Scientist of the Year (2024), College of Pure and Applied Science, Caleb University.
- Recipient of the Dean's Recommendation Letter for Academic Excellence and Research Commitment (2025).

SKILLS

Laboratory: PCR, Western Blotting, Chromatography, Spectrophotometry, ELISA, Electrophoresis, DNA Extraction & Purification

Computational: SQL, Power BI, Python, Molecular Docking & Post-Docking Analysis, ADMET Profiling, Gene Ontology & Pathway Enrichment Analysis, Computer-Aided Drug Design

Research: Data analysis, molecular assay design, scientific writing, literature synthesis
